

Dear Collin,

As the newest Doctors Express Center to complete build-out and outfitting, I want to express our profound thanks for the outstanding work done by all our support team. I have been totally blown away by the speed, efficiency and the quality of work performed by all contributing to this effort. Everyone who has toured our completed site has commented on the excellent quality of construction work performed.

F.C. Dadson's preparatory efforts and ongoing support during the construction ensured excellent progress and resulted in a zero item punch-out list which I have never experienced before in any previous project. We have a fully operational, amazingly functional Urgent Care Center that sailed through all local and state inspections flawlessly.

Obviously, we are thrilled with the end result and happy to have such a showplace now in the heart of our community. I cannot say enough to give justice to all who supported this effort. Well done folks!

Sincerely,

Earl Reed
